CHAMELEON GLASS – SPECIALTY INTERLAYER SYSTEM

Chameleon glass changes color with a change in lighting or the angle of viewing. It provides a striking visual effect where people naturally move past the glass, where bent glass is used, or where the glass itself moves, such as a door. Natural and artificial lighting can also be used to highlight the chameleon effect.

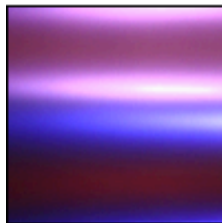

Cyan/Purple Chameleon Doors

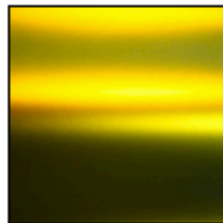

Red/Gold Chameleon Curtain Wall

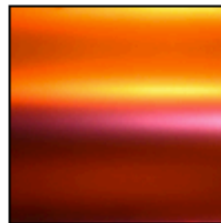

Seven chameleon colors are available.

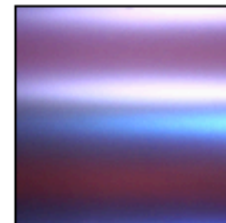

11879 Blue/Red

11452 Gold/Silver
